PROFESSIONAL EXPERIENCE

Revvity, Inc. | AI Product Manager Co-op

Boston, MA | Feb 2025 - Aug 2025

- Piloted the launch of an AI-powered scientific search platform, embedding semantic search and generative summarization into research workflows to reduce insight-retrieval time by 35%.
- Directed refinement of a modular LLM architecture, using NLP algorithms and funnel analytics to reduce response latency and increase product activation by 35%.
- Built scalable AI tooling and automation pipelines for Text-to-Speech, ASR, and conversational AI model training, improving training efficiency and model accuracy by 29%.
- Partnered with engineering teams and subject-matter experts on user stories, usability improvements, and compliant scientific workflows, contributing to 25% faster query resolution, 20% higher CSAT and adoption, and 28% fewer delivery bottlenecks.
- Collaborated with data science and MDM teams to deliver predictive dashboards in Power BI, EBX, and ServiceNow, reducing stakeholder reporting time by 40%.

NTT DATA Technology Services | Product Manager, Payment Platform

Noida, India | Jun 2022 - Jun 2023

- Orchestrated delivery of API-first, cloud-based payment integration workflows on AWS, enabling real-time transaction processing, settlement, and reconciliation while supporting PCI, AML/KYC, and ISO 20022 compliance.
- Implemented CI/CD pipelines and deployment automation for payment and Amazon Connect services, improving release reliability and reducing release cycles by 25%.
- Led roadmap execution for digital payments, card provisioning, and assisted account onboarding, aligning compliance and business stakeholders around security and regulatory goals and increasing digital engagement by 20%.

L&T Technology Services | Product Analyst Engineer, Autonomous Vehicle Program

Bengaluru, India | Feb 2020 - Dec 2021

- Spearheaded annotation workflows for LiDAR, radar, and camera data in an autonomous driving test environment, enabling 2M+ frame annotations and reducing data turnaround time by 35%.
- Owned sprint planning and backlog execution in Jira, accelerating delivery timelines by 30% through planning, prioritization, and agile execution.
- Partnered with product owners and technical teams to define strategy, roadmap, and delivery priorities, operationalizing KPI dashboards that improved visibility into adoption, performance, and business impact.

Attrofy Pvt. Ltd. | Product Operations Executive, Supply Chain Solutions

Bengaluru, India | May 2017 - Jan 2020

- Designed product operations workflows and demand forecasting systems for B2B supply chain clients, reducing inventory holding costs by 18% and improving visibility for a \$2M portfolio.
- Converted on-ground supply chain challenges into product requirements for batch tracking, ASN mismatches, cycle-count variance, and automated replenishment signals.
- Conducted root-cause analysis using Six Sigma methods, identifying warehouse process bottlenecks and recovering 1,200+ labor hours annually across cross-functional operations.

PROJECTS

Study Buddy: Intelligent Learning Assistant with Q&A

Dec 2024

- Established product vision and feature roadmap for a learning assistant that supports transcription, summaries, and user Q&A, improving study efficiency by 40%.
- Conducted 50+ user interviews using Notion and Google Forms, shaping development priorities and increasing engagement by 30%.

Gigspace: AI and Geolocation-Based Gig Matching Platform

- Created product requirements for a marketplace matching users to gigs based on skills, location, availability, and role preferences.
- Defined core user flows, matching logic, and success metrics for an MVP focused on early gig discovery and candidate quality.

SKILLS

- **Product:** Roadmapping, product requirements, user stories, backlog management, stakeholder alignment, sprint planning
- **AI/ML Products:** LLM workflows, semantic search, generative summarization, conversational AI, ASR, Text-to-Speech
- **Analytics:** Power BI, funnel analytics, KPI dashboards, usage analytics, experimentation
- **Delivery:** Jira, agile execution, CI/CD coordination, compliance-aware product delivery
- **Domains:** Scientific workflows, payments, supply chain, autonomous vehicle data operations

EDUCATION

Northeastern University

Boston, MA | M.S. in Project Management and Analytics | Expected Dec 2025
