EDUCATION

Northeastern University

Boston, MA | Master of Science in Information Systems | Aug 2023 - Dec 2025

WORK EXPERIENCE

Staples | AI Engineer Co-op

Framingham, MA | Jan 2025 - Aug 2025

- Built a Genie Router Agent using the Databricks Genie API and LangGraph orchestration for 120+ analysts, reducing SQL query time by 30%.
- Designed an inference pipeline with MLflow 3.0 tracing, automated drift monitoring, and real-time performance dashboards.
- Developed a Creative Assistant for email orchestration using LangGraph and Mem0, integrated with brand guidelines and Databricks Lakebase to generate five on-brand email variations, increasing engagement by 40%.
- Designed an A/B testing framework for LLM evaluation with statistical significance testing and guardrail metrics across 5+ production experiments, reducing routing errors by 25%.
- Engineered a customer-bot evaluation pipeline using MLflow 3.0, implementing custom scorers for missing-response detection, routing accuracy, and conversation completeness.
- Automated log ingestion into Unity Catalog with daily parsing and evaluation workflows, reducing manual QA cycles by 25%.
- Implemented RBAC-based personalization segment management, restricting creation and deletion to authorized users and strengthening governance across AI workflows.

Spookfish Innovations | Software Developer, Machine Learning

Bangalore, India | Jan 2023 - Aug 2023

- Developed an automated tablet-inspection system with OpenCV and TensorFlow, processing 1,000+ images and improving inference speed and measurement accuracy by 20%.
- Designed and optimized end-to-end ML pipelines for data preprocessing, feature engineering, model training, and deployment, enabling scalable pharmaceutical quality control.
- Built inspection analytics dashboards in Tableau by integrating outputs from deep learning models, accelerating manufacturing decision-making and cross-team visibility.
- Collaborated with product and operations teams to define requirements and deploy ML workflows into existing manufacturing processes.

PROJECTS

Smart E-Commerce: AI-Powered Product Optimization Platform

Boston, MA | Python, Prompt Engineering, RAG, Streamlit, OpenAI API, FastAPI | Aug 2025 - Nov 2025

- Architected a multimodal AI system analyzing 2,000+ product listings using few-shot learning, chain-of-thought prompting, ReAct, iterative refinement, and embedding-based semantic similarity.
- Achieved 85%+ accuracy in detecting image-description mismatches and reduced manual review time by 80%.
- Engineered a LangGraph-based workflow with automatic quality validation, conditional regeneration, and feedback loops for AI self-improvement.
- Built a security layer detecting 15+ prompt injection patterns, achieving 100% attack prevention while maintaining sub-3-second response time.
- Deployed a full-stack application with a FastAPI backend, Streamlit frontend, LangSmith monitoring, and PDF reporting with risk scores and prioritized recommendations.

Zeus AI: Agentic Salesforce Code Generation

Boston, MA | Python, Claude Sonnet, MCP, LangChain, Agentic AI, Salesforce | May 2025 - Aug 2025

- Architected a five-agent system using Claude Sonnet and Model Context Protocol to generate production-ready Salesforce code with 90%+ test coverage.
- Reduced development time from hours to under 30 seconds and built seven custom MCP tools analyzing 500+ classes with 95% conflict detection accuracy.
- Deployed a full-stack application with React frontend, RESTful API, and automated validation pipeline covering unit tests, PMD analysis, and SOQL optimization.

SKILLS

- **Programming Languages:** Python, SQL, R, C++
- **Machine Learning and AI:** LLMs, LangChain, LangGraph, Claude, GPT-4, prompt engineering, agentic AI, MCP, TensorFlow, PyTorch, OpenCV
- **MLOps and Deployment:** Databricks, MLflow, Docker, CI/CD, FastAPI, Streamlit, LangSmith, AWS S3, AWS Lambda, SageMaker
- **Data Engineering:** SQL, Delta Lake, ETL, data warehousing, Apache Airflow
- **Tools and Frameworks:** Git, GitHub, REST APIs, microservices, Tableau, Power BI
