EXPERIENCE

Dassault Systemes | Software Engineer

Waltham, MA | Jan 2026 - May 2026

- Engineered a feature flag platform in TypeScript with MSSQL and Redis, enabling A/B testing, gradual rollouts, and instant rollbacks without redeloys.
- Designed and delivered a multi-agent AI workflow over Elasticsearch crash logs, reducing engineering triage time by 50% through automated root-cause reports and feature-usage analytics.

Dassault Systemes | Software Engineer

Waltham, MA | Jan 2025 - Aug 2025

- Led decomposition of a Python monolith into 5+ TypeScript microservices on Kubernetes, reducing deployment time by 80% and increasing throughput to 100K documents per hour.
- Proposed and architected centralized logging with Fluent Bit and Elasticsearch, achieving full service visibility and reducing debugging time by 75%.
- Standardized Docker images on Alpine Linux and authored Helm charts for Kubernetes deployments, shrinking image size by 75% and eliminating release-configuration drift.

Infosys Limited | Software Engineer

Bangalore, India | Jun 2021 - Jul 2023

- Developed the React front end for an in-store retail order application, accelerating checkout workflows by 20% for cashier teams across retail locations.
- Delivered a Jenkins CI/CD pipeline for a Java order backend, automating build and deployment stages to shorten release cycles by 20%.
- Authored Bash tooling to rotate logs and renew SSL certificates across Java order services, cutting manual operations effort by 50% and preventing production disk-fill incidents.
- Designed Java REST APIs that aggregated order data for reporting dashboards, serving 10K+ daily requests from inventory and sales analytics teams.

TECHNICAL SKILLS

- Languages:** Go, JavaScript, TypeScript, Java, Python, SQL
- Frontend:** Angular, React, Next.js, HTML, CSS
- Backend:** Spring Boot, Node.js, REST APIs, microservices
- Databases:** MongoDB, Redis, PostgreSQL, MSSQL, ChromaDB
- AI/ML:** LangChain, LangGraph, RAG, multi-agent systems, LLM orchestration
- Cloud/DevOps:** AWS, Kubernetes, Terraform, Docker, Elasticsearch, Git, Jenkins, Kafka, RabbitMQ, Unix/Linux

PROJECTS

CVE-GPT

Go, Python, Kubernetes, AWS, Kafka, PostgreSQL, Flask, Helm, Prometheus, Istio

- Engineered an event-driven CVE ingestion pipeline on Kubernetes with a custom Go operator orchestrating Kafka producers and consumers into PostgreSQL and Pinecone.
- Deployed self-hosted LLaMA 3 via Ollama in-cluster behind a Flask API that answers CVE questions and surfaces vulnerabilities in user codebases.

Financial Advisor AI

Python, LangGraph, FastAPI, Pydantic, React, ChromaDB, PostgreSQL

- Architected a multi-agent RAG pipeline in LangGraph with query routing across specialized agents, returning cited and confidence-scored responses.
- Built a FastAPI and Pydantic microservice with document ingestion, ChromaDB retrieval, and streamed LLM responses to a React frontend.

EDUCATION

Northeastern University

Boston, MA | M.S. in Software Engineering Systems | Sep 2023 - Dec 2025 | GPA: 3.83/4.0

Dharmsinh Desai University

Nadiad, India | B.E. in Instrumentation and Control Engineering | Sep 2017 - May 2021 | GPA: 8.6/10.0
